

Personal Protective Equipment Protocols in place:

- Ozone water system
- Ivory Releaf and Dry Shield aerosol containment systems
- Level 3 masks with N95 backups
- Hepa H13 Air purifier in each op as other central rooms
- Multiple 7000mg Overnight Ozone sanitation system generators
- Antimicrobial/antibacterial systems in water system
- Ozone water Laundry disinfectant/sanitation for PPE
- Face shields FOR EVERY EMPLOYEE
- Each patient rinses with Ozone water or Peroxide mouth rinse
- We have removed any and all items in each operatory that can not be wiped with disinfectants after each patient
- Prescreen patients over the phone and upon patient arrival we check temperature and oxygen levels
- Minimize the amount of people we allow in office to ensure a safe distance from each other

And this is just the beginning. We will forever be learning and growing to keep our team and patients safe.
